This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Revision submitted to the Special Issue on Software Engineering Education and Training,
Journal of Systems and Software, May 2018

Highlights

- Tertiary students face constraints in practicing agile methods in a university context.
- Adaptations are made by students to work around the identified constraints.
- These adaptations are perceived to have both positive and negative effects.
