Software search is not a science, even among scientists: A survey of how scientists and engineers find software

M. Hucka, M.J. Graham

PII: S0164-1212(18)30051-7
DOI: [10.1016/j.jss.2018.03.047](https://doi.org/10.1016/j.jss.2018.03.047)
Reference: JSS 10130

To appear in: *The Journal of Systems & Software*

Received date: 29 July 2017
Revised date: 17 March 2018
Accepted date: 18 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Scientists and engineers do not use specialized methods or resources to find software
- Developers differ from nondevelopers in how they look for ready-to-run software
- Developers search in community help sites even when looking for ready-to-run software
- Software characteristics that matter include support for specific data/file standards
