This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Consequences of happiness and unhappiness among software developers detailed
- More positive consequences of happiness are experienced related to the self
- More negative consequences of unhappiness are experienced for external factors
- Results based on qualitative analysis of more than 300 developers' experiences
- Category scheme of consequences usable for further studies and as guidelines
