This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We conduct a survey to characterize software sustainability dimensions from different perspectives.
- Relevant quality requirements that contribute to each sustainability dimension are identified.
- Direct dependencies among sustainability dimensions are derived from survey results.
- Perceived Usefulness of sustainability model is also evaluated.
