Do Android Developers Neglect Error Handling? A
Maintenance-Centric Study on the Relationship Between Android
Abstractions and Uncaught Exceptions

Juliana Oliveira, Deise Borges, Thaisa Silva, Nelio Cacho,
Fernando Castor

PII: S0164-1212(17)30255-8
DOI: [10.1016/j.jss.2017.10.032](https://doi.org/10.1016/j.jss.2017.10.032)
Reference: JSS 10061

To appear in: *The Journal of Systems & Software*

Received date: 24 August 2016
Revised date: 17 July 2017

A Maintenance-Centric Study on the Relationship Between Android Abstractions and Uncaught Exceptions, *The Journal of Systems & Software* (2017), doi: [10.1016/j.jss.2017.10.032](https://doi.org/10.1016/j.jss.2017.10.032)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Most of the method calls to Android abstractions are not protected.
- Use of Android abstractions often decreases robustness.
- Lack of changes to exception handling code leads to uncaught exception.
- The change scenarios that decrease robustness are described.
