This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Presents a process-line for selecting software asset origins and components.
- Process-line helps decision-makers to build their decisions-making process.
- The process-line is evaluated through five case studies in three companies.
- The practitioners did not perceive any activity to be missing in the process-line.
- A sub-set of activities were followed by the companies without any specific order.
