Clustering-based acceleration for virtual machine image deduplication in the cloud environment

Jiwei Xu, Wenbo Zhang, Zhenyu Zhang, Tao Wang, Tao Huang

PII: S0164-1212(16)00053-4
DOI: [10.1016/j.jss.2016.02.021](https://doi.org/10.1016/j.jss.2016.02.021)
Reference: JSS 9687

To appear in: *The Journal of Systems & Software*

Received date: 20 December 2014
Revised date: 8 January 2016
Accepted date: 20 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Use a clustering-based classification to reduce the fingerprint search space.
- Take the image content layout into consideration during image deduplication.
- Propose periodical triggering and small group merging to facilitate VM deduplication.
- Evaluate the effectiveness, efficiency and robustness of the proposed method.
