This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Ontological context model that can be instantiated for the software domain
- Context that supports information sharing and reuse among tools within the software domain.
- Application examples for the use of the context model in the software domain.
- Evaluation of the model to illustrate the applicability for mentor assignment.
