This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We review the literature of software ecosystems up to date consisted of 231 papers
- Identify a field rapidly evolving and growing both in volume and empirical focus
- We note signs of field maturity in the evolution of the field
- Identify issues inhibiting the field evolution and propose means of addressing them
- Propose the update of the definition of software ecosystems
