This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Self-organizing teams are closely involved in project management activities.
- High team involvement in project management leads to new challenges.
- We present the multiple levels of agile project management challenges.
- Relationships between challenges at different levels were also identified.
- Teams and managers need to address these challenges in order to be effective.
