This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We performed a systematic mapping study on mobile application testing techniques.
- 79 empirical studies are mapped to a classification schema.
- Classification scheme includes, structure the topic, evaluation type and contribution facets.
- Several research gaps in current literature are revealed and discussed.
