Hyper-heuristic Approach for Multi-Objective Software Module Clustering

A. Charan Kumari , K. Srinivas

PII: S0164-1212(16)30023-1
DOI: [10.1016/j.jss.2016.04.007](https://doi.org/10.1016/j.jss.2016.04.007)
Reference: JSS 9730

To appear in: *The Journal of Systems & Software*

Received date: 17 July 2015
Revised date: 4 April 2016
Accepted date: 5 April 2016

Please cite this article as: A. Charan Kumari , K. Srinivas , Hyper-heuristic Approach for Multi-Objective Software Module Clustering, *The Journal of Systems & Software* (2016), doi: [10.1016/j.jss.2016.04.007](https://doi.org/10.1016/j.jss.2016.04.007)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Efficacy of hyper-heuristic approach for module clustering was studied
- Hyper-heuristic approach is effective in identifying “high quality” clusters
- Hyper-heuristic approach is “fast” enough to reach out to the optimum
- User-friendly framework for software module clustering is presented
