This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- This paper presents the development of Software Outsourcing Partnership Model.
- We have executed research methodologies like SLR, Empirical study and Case study.
- We have adopted various models such as CMMI, IMM and SOVRM for this model.
- We have identified a total of 14 CSFs and 142 practices for their implementation.
- The SOPM was validated through the conduction of two case studies in the industry.
