This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Software industry led Scrum to the cutting-edge of software engineering education
- We designed teaching strategies based on the Felder-Silverman learning style model
- We applied the strategies in a Scrum course and analyzed the learning outcomes
- The analysis is based on two controlled experiments carried out in 2013 and 2014
- Students' outcomes improved when receiving the suitable teaching strategy
