This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Online serious games are used to facilitate distributed requirements elicitation.
- Interactive games enhance collaboration and communication between project members.
- Serious games raise individuals' confidence to engage in requirements elicitation.
- Using serious games can improve both quality and quantity of software requirements.
- Serious games specially enhance the performance of less-experienced stakeholders.
