This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- The group comparison reveals three potential adoption inhibitors, security, data privacy, and portability
- Security concern results in an up to 26-fold increase in the non-adoption likelihood
- Concerns about availability, integration, and migration complexity are not likely to hold back cloud adoption initiatives
