This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- The Clinical Nutritional Information System (CNIS) was constituted design and implementation based on the Nutrition Care Process and Model (NCPM) and Patient Nutrition Care Process.
- Dietitians used CNIS, 95% reported satisfaction with 91.66% indicating that CNIS is really helpful in their work.
- Approximately 58% work time was saved with the assistance of CNIS.
