This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A nonlinear integer programming model of dynamic lotsizing with queueing.
- A rounding heuristic and a feasibility pump heuristic are given
- The rounding procedure produces good solutions in less time than the feasibility pump.
