This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

**Highlights**

- A practical solution to asset protection problem during escaped wildfires.
- Time efficient and accurate ALNS to solve the problem in operational time.
- New removal and insertion heuristics within ALNS.
- Empirical tests verify the practical applicability of our approach.
