Heuristics Based on Genetic Algorithms for the Capacitated Multi Vehicle Production Distribution Problem

Ahmed Senoussi, Stéphane Dauzère-Pérès, Nadjib Brahim, Bernard Penz, Nadia Kinza Mouss

PII: S0305-0548(18)30101-1
DOI: [10.1016/j.cor.2018.04.010](https://doi.org/10.1016/j.cor.2018.04.010)
Reference: CAOR 4451

To appear in: *Computers and Operations Research*

Received date: 5 April 2017
Revised date: 11 April 2018
Accepted date: 12 April 2018

Please cite this article as: Ahmed Senoussi, Stéphane Dauzère-Pérès, Nadjib Brahim, Bernard Penz, Nadia Kinza Mouss, Heuristics Based on Genetic Algorithms for the Capacitated Multi Vehicle Production Distribution Problem, *Computers and Operations Research* (2018), doi: [10.1016/j.cor.2018.04.010](https://doi.org/10.1016/j.cor.2018.04.010)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A production distribution problem with clustered retailers is solved.
- Five heuristics based on a Genetic Algorithm are proposed.
- Experiments show that the best heuristics outperform a commercial solver.
