This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We presented a Path-Relinking approach to the MRCPSP
- We designed this method to be simpler than early literature's methods.
- We performed computational tests over PSPLIB benchmark instances using PR's JAVA implementation.
- We show that our PR method implementation dominates the previous results within similar computational efforts.
