This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We consider the two-stage cutting stock problem.
- The mathematical model is solved by simultaneous column-and-row generation.
- The pricing subproblem is a knapsack problem with a large set of items.
- Three algorithms including branch-and-price are proposed for the knapsack problem.
