Accepted Manuscript

Loop-based Conic Multivariate Adaptive Regression Splines Is a Novel Method for Advanced Construction of Complex Biological Networks

Ezgi Ayyıldız, Vilda Purutçuoğlu, Gerhard Wilhelm Weber

PII: S0377-2217(17)31112-8
DOI: 10.1016/j.ejor.2017.12.011
Reference: EOR 14870

To appear in: *European Journal of Operational Research*

Received date: 31 January 2017
Revised date: 15 November 2017
Accepted date: 5 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A new alternate model for complex biological systems is proposed.
- A loop-based conic multivariate adaptive regression splines model.
- The accuracy was assessed by applying the model to different real biological networks.
- The loop-based conic multivariate adaptive regression splines is more accurate.
