This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- General framework for multi-task simultaneous Bayesian Optimisation
- Novel approaches that are able to account for correlation between tasks and parameter settings
- Different approaches are needed for maximising best samples and best predictions
- New approaches outperform state-of-the-art
