Disaster preparedness using risk-assessment methods from earthquake engineering

Maria Battarra, Burcu Balcik, Huifu Xu

PII: S0377-2217(18)30129-2
DOI: [10.1016/j.ejor.2018.02.014](https://doi.org/10.1016/j.ejor.2018.02.014)
Reference: EOR 14974

To appear in: *European Journal of Operational Research*

Received date: 19 November 2016
Revised date: 24 January 2018
Accepted date: 6 February 2018

Please cite this article as: Maria Battarra, Burcu Balcik, Huifu Xu, Disaster preparedness using risk-assessment methods from earthquake engineering, *European Journal of Operational Research* (2018), doi: [10.1016/j.ejor.2018.02.014](https://doi.org/10.1016/j.ejor.2018.02.014)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Risk forecasting models from earthquake engineering for optimisation models
- A data-driven method to avoid scenarios for the allocation of emergency supplies
- Application of the new method to the Turkish Red Crescent case study
