This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We present integer programming models for the patient-bed assignment problem
- We develop an efficient matheuristic to solve the NP-hard patient-bed assignment problem
- We discuss on penalty values for soft models and improves all the best-known values in the literature
