Parallel Machine Scheduling with Speed-Up Resources

Lin Chen, Deshi Ye, Guochuan Zhang

PII: S0377-2217(18)30073-0
DOI: 10.1016/j.ejor.2018.01.037
Reference: EOR 14938

To appear in: *European Journal of Operational Research*

Received date: 19 October 2016
Revised date: 4 January 2018
Accepted date: 9 January 2018

Please cite this article as: Lin Chen, Deshi Ye, Guochuan Zhang, Parallel Machine Scheduling with Speed-Up Resources, *European Journal of Operational Research* (2018), doi: 10.1016/j.ejor.2018.01.037

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We study scheduling problems where processing times can be reduced via resources.
- We provide a constant approximation algorithm for the general problem.
- We provide polynomial time approximation schemes for special cases.
- We establish a relationship between the two main parameters of the problem.
