Optimal Periodic Flexible Policies for Two-Stage Serial Supply Chains

Fang Liu, Srinagesh Gavirneni

PII: S0377-2217(18)30004-3
DOI: [10.1016/j.ejor.2018.01.004](https://doi.org/10.1016/j.ejor.2018.01.004)
Reference: EOR 14905

To appear in: *European Journal of Operational Research*

Received date: 23 May 2017
Revised date: 27 November 2017
Accepted date: 4 January 2018

Please cite this article as: Fang Liu, Srinagesh Gavirneni, Optimal Periodic Flexible Policies for Two-Stage Serial Supply Chains, *European Journal of Operational Research* (2018), doi: [10.1016/j.ejor.2018.01.004](https://doi.org/10.1016/j.ejor.2018.01.004)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Study the optimal structure of the periodic flexible policy using calculus of variations
- Find two possible structures for the period flexible policy that could be optimal
- Numerical study shows that piecewise linear restricted order functions are good approximations of the optimal policy
