Multi-level Facility Location Problems

Camilo Ortiz-Astorquiza, Ivan Contrerasn, Gilbert Laporte

PII: S0377-2217(17)30932-3
DOI: [10.1016/j.ejor.2017.10.019](https://doi.org/10.1016/j.ejor.2017.10.019)
Reference: EOR 14743

To appear in: *European Journal of Operational Research*

Received date: 21 March 2017
Revised date: 26 September 2017
Accepted date: 10 October 2017

Please cite this article as: Camilo Ortiz-Astorquiza, Ivan Contrerasn, Gilbert Laporte, Multi-level Facility Location Problems, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.10.019](https://doi.org/10.1016/j.ejor.2017.10.019)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We conduct a comprehensive review on multi-level facility location problems
- We present the main characteristics of these problems and identify three categories
- We discuss some similarities and differences with related areas
- We present overviews of formulations, algorithms and applications
- We trace the historical development of the field
