New special cases of the Quadratic Assignment Problem with diagonally structured coefficient matrices

Eranda Çela, Vladimir Deineko, Gerhard J. Woeginger

PII: S0377-2217(17)31143-8
DOI: [10.1016/j.ejor.2017.12.024](https://doi.org/10.1016/j.ejor.2017.12.024)
Reference: EOR 14883

To appear in: *European Journal of Operational Research*

Received date: 6 September 2016
Revised date: 12 December 2017
Accepted date: 15 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- polynomially solvable special cases of the Quadratic Assignment Problem
- coefficient matrices with special diagonal structure and particular Robinson matrices
- Efficient recognition of the particular Robinson matrices
