Joint Optimization of Dynamic Lot and Warehouse Sizing Problems

Jie Fan , Guoqing Wang

PII: S0377-2217(17)31138-4  
DOI: [10.1016/j.ejor.2017.12.019](https://doi.org/10.1016/j.ejor.2017.12.019)  
Reference: EOR 14878

To appear in: *European Journal of Operational Research*

Received date: 23 September 2016  
Revised date: 21 August 2017  
Accepted date: 11 December 2017

Please cite this article as: Jie Fan , Guoqing Wang , Joint Optimization of Dynamic Lot and Warehouse Sizing Problems, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.12.019](https://doi.org/10.1016/j.ejor.2017.12.019)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- Present a new model for the joint optimization of lot and warehouse sizes.
- Develop an efficient algorithm which outperforms the commercial solver Cplex.
- Show the benefit from the joint optimization with computational experiments.
