To appear in: *European Journal of Operational Research*

Received date: 14 December 2016  
Revised date: 13 December 2017  
Accepted date: 18 December 2017

Please cite this article as: Christof Defryn, Kenneth Sörensen, Multi-objective optimisation models for the travelling salesman problem with horizontal cooperation, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.12.028](https://doi.org/10.1016/j.ejor.2017.12.028)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We consider the travelling salesman problem with horizontal cooperation
- We distinguish individual partner objectives from coalition objectives
- Two general solution approaches are presented to tackle cooperative routing problems
- The merits and drawbacks of both approaches are investigated
