Multi-objective Stackelberg Game Model for Water Supply Networks against Interdictions with Incomplete Information

J. Jiang , X. Liu

PII: S0377-2217(17)30947-5
DOI: [10.1016/j.ejor.2017.10.034](https://doi.org/10.1016/j.ejor.2017.10.034)
Reference: EOR 14758

To appear in: *European Journal of Operational Research*

Received date: 5 June 2016
Revised date: 7 October 2017
Accepted date: 16 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A Stackelberg game model for defender against interdictions is formulated
- A nested genetic algorithm is designed for equilibrium analysis
- The impact of the incomplete information on equilibrium is discussed
