This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

**Highlights**

- We propose new arc-time index formulations for scheduling with periodic maintenances
- We devise a simple iterative exact algorithm that yields high quality results
- All existing benchmark instances are solved to optimality
- New instances are introduced and most are solved optimally
