

Accepted Manuscript

A network model for minimizing the total organ transplant costs

Valeria Caruso, Patrizia Daniele

PII: S0377-2217(17)30887-1
DOI: [10.1016/j.ejor.2017.09.040](https://doi.org/10.1016/j.ejor.2017.09.040)
Reference: EOR 14718

To appear in: *European Journal of Operational Research*

Received date: 1 June 2016
Revised date: 23 September 2017
Accepted date: 26 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The optimality conditions for the national health service are determined
- The variational inequality formulation is derived
- The Lagrange theory related to the model is studied
- The Lagrange multipliers are analyzed
- Some numerical examples are presented
