A Chance-Constrained Programming Framework to Handle  
Uncertainties in Radiation Therapy Treatment Planning

Maryam Zaghian, Gino J. Lim, Azin Khabazian

PII: S0377-2217(17)30931-1  
DOI: [10.1016/j.ejor.2017.10.018](https://doi.org/10.1016/j.ejor.2017.10.018)  
Reference: EOR 14742

To appear in: *European Journal of Operational Research*

Received date: 30 August 2016  
Revised date: 5 July 2017  
Accepted date: 11 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A new stochastic model for radiation therapy planning
- A chance-constrained optimization framework to handle setup uncertainties.
- Confidence level, the plan quality (robustness and homogeneity) are optimized.
- Second order cone constraint counterparts of the model are developed
