WHOLE BLOOD OR APHERESIS DONATIONS? A MULTI-OBJECTIVE STOCHASTIC OPTIMIZATION APPROACH

Andres F. Osorio , Sally C. Brailsford , Honora K. Smith

PII: S0377-2217(17)30795-6
DOI: [10.1016/j.ejor.2017.09.005](https://doi.org/10.1016/j.ejor.2017.09.005)
Reference: EOR 14683

To appear in: *European Journal of Operational Research*

Received date: 13 June 2016
Revised date: 4 September 2017
Accepted date: 5 September 2017

A MULTI-OBJECTIVE STOCHASTIC OPTIMIZATION APPROACH, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.09.005](https://doi.org/10.1016/j.ejor.2017.09.005)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A novel methodology for the stochastic multi-objective optimization problem
- Evaluation of the optimality gap for each non-dominated solution.
- Consideration of several important characteristics of the blood supply chain
- Discussion of several solution methods for the Sample Average Approximation problem
