Minimum energy target tracking with coverage guarantee in wireless sensor networks

Charly Lersteau, André Rossi, Marc Sevaux

PII: S0377-2217(17)30776-2  
DOI: [10.1016/j.ejor.2017.08.045](https://doi.org/10.1016/j.ejor.2017.08.045)  
Reference: EOR 14664

To appear in: *European Journal of Operational Research*

Received date: 22 September 2016  
Revised date: 21 August 2017  
Accepted date: 22 August 2017

Please cite this article as: Charly Lersteau, André Rossi, Marc Sevaux, Minimum energy target tracking with coverage guarantee in wireless sensor networks, *European Journal of Operational Research* (2017), doi: [10.1016/j.ejor.2017.08.045](https://doi.org/10.1016/j.ejor.2017.08.045)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- This paper addresses target tracking using wireless sensor networks
- Robustness is provided through an uncertainty disc
- Long term requirement is taken into account as well as short term energy consumption
- A matheuristic-based column generation algorithm is proposed and shown efficient
