This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

## Highlights

- We propose an embedded feature selection approach for support vector machines.
- The approach is based on iteratively adjusting the l1-norm of the classifier vector.
- We demonstrate the proposed approach on two real-life problems.
- The use cases include diagnosis of tumors and sentiment classification of reviews.
