This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We develop a comprehensive model for LNG ADP problem.
- We model several practical aspects of ADP problem overlooked in the literature.
- We provide insights on how additional aspects of the model affects the ADP.
- We develop a novel solution that affectively solves realistic size problems.
- We establish how various problem parameters affect solution quality.
