Accepted Manuscript

Multiple-Path Selection for new Highway Alignments using Discrete Algorithms

Yasha Pushak, Warren Hare, Yves Lucet

PII: S0377-2217(15)00673-6
DOI: 10.1016/j.ejor.2015.07.039
Reference: EOR 13128

To appear in: *European Journal of Operational Research*

Received date: 24 October 2014
Revised date: 10 July 2015
Accepted date: 16 July 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Multiple dissimilar paths are computed within time and quality constraints
- 56% speed improvement without quality reduction.
- bidirectional search using A* and simple height restriction outperforms other approaches
