Scheduling operating theatres: Mixed integer programming vs.
Constraint programming

Tao Wang , Nadine Meskens , David Duvivier

PII: S0377-2217(15)00522-6
DOI: [10.1016/j.ejor.2015.06.008](https://doi.org/10.1016/j.ejor.2015.06.008)
Reference: EOR 13015

To appear in: *European Journal of Operational Research*

Received date: 30 January 2014
Revised date: 1 June 2015
Accepted date: 5 June 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We model the problem with mixed integer programming and constraint programming.
- The two models are presented in detail and compared on real data.
- We take into account the affinity relationships between surgical team members.
