This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- New perspective in decision-making on medical device.
- Experts' competences were assessed based on subjective and objective data.
- AHP method is used as the basis for problem solution.
- Presenting a new MCDM model for medical devices selection.
- Selecting the best MRI system for hospitals with foresight perspective.
