Decomposition Based Hybrid Metaheuristics

Günther R. Raidl

PII: S0377-2217(14)00987-4
DOI: [10.1016/j.ejor.2014.12.005](https://doi.org/10.1016/j.ejor.2014.12.005)
Reference: EOR 12663

To appear in: *European Journal of Operational Research*

Received date: 15 February 2014
Revised date: 1 December 2014
Accepted date: 3 December 2014

Please cite this article as: Günther R. Raidl, Decomposition Based Hybrid Metaheuristics, *European Journal of Operational Research* (2014), doi: [10.1016/j.ejor.2014.12.005](https://doi.org/10.1016/j.ejor.2014.12.005)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Decomposition based hybrid metaheuristics are surveyed.
- Prominent design templates of hybrid metaheuristics are summarized.
- Focus on Lagrangian decomposition, column generation, and Benders' decomposition.
- Promising future research directions are pointed out.
