Wallace, Interdependent network restoration: On the value of information-sharing, *European Journal of Operational Research* (2015), doi: [10.1016/j.ejor.2014.12.051](https://doi.org/10.1016/j.ejor.2014.12.051)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We propose models for decentralization in interdependent infrastructure restoration.
- We provide new mathematical formulations to capture restoration interdependencies.
- We measure the loss in restoration effectiveness resulting from decentralization.
- This loss can be greatly mitigated by having infrastructures share information.
