Appraising production targets through agent-based Petri net simulation of material handling systems in open pit mines

Burak Ozdemir , Mustafa Kumral

PII: S1569-190X(18)30092-3
DOI: [10.1016/j.simpat.2018.06.008](https://doi.org/10.1016/j.simpat.2018.06.008)
Reference: SIMPAT 1825

To appear in: *Simulation Modelling Practice and Theory*

Received date: 22 March 2018
Revised date: 26 June 2018
Accepted date: 29 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Uncertainty management in mining engineering
- Agent-based Petri net simulation for materials handling systems in open-pit mining operation
- Control of production rates, head grade and fuel consumption
