Title: Green Swarm: Greener Routes with Bio-inspired Techniques

Author: Daniel H. Stolfi Enrique Alba

PII: S1568-4946(18)30420-4

DOI: <https://doi.org/doi:10.1016/j.asoc.2018.07.032>

Reference: ASOC 5000

To appear in: *Applied Soft Computing*

Received date: 5-9-2017

Revised date: 25-4-2018

Accepted date: 14-7-2018

Please cite this article as: Daniel H. Stolfi, Enrique Alba, Green Swarm: Greener Routes with Bio-inspired Techniques, *Applied Soft Computing Journal* (2018), <https://doi.org/10.1016/j.asoc.2018.07.032>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- We reduce greenhouse gas emissions, fuel consumption, and travel times of vehicles.
- We suggest a potentially customized route to each vehicle.
- We have designed an EA to compute the configuration of the system.
- Our proposal has achieved competitive results when compared to other strategies.
- Green Swarm improves all the metrics analyzed even when only 10% of drivers are using it.
