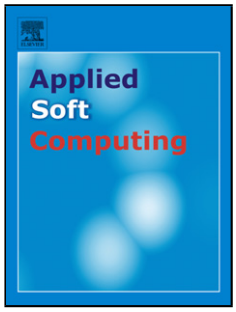
Accepted Manuscript



Title: Differential Evolution Training Algorithm for Dendrite Morphological Neural Networks

Author: Fernando Arce Erik Zamora Humberto Sossa Ricardo Barrón

PII: S1568-4946(18)30155-8
DOI: https://doi.org/doi:10.1016/j.asoc.2018.03.033
Reference: ASOC 4782

To appear in: *Applied Soft Computing*

Received date: 27-12-2016
Revised date: 15-1-2018
Accepted date: 20-3-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights (for review)

- For the first time, we propose a training algorithm for a dendrite morphological neural network based on differential evolution.
- This evolutionary training method outperforms to state-of-the-art for training dendrite morphological neural networks.
