Title: A Novel Hybrid Algorithm Based on
Biogeography-Based Optimization and Grey Wolf Optimizer

Author: Xinming Zhang Qiang Kang Jinfeng Cheng Xia
Wang

PII: S1568-4946(18)30108-X
DOI: <https://doi.org/doi:10.1016/j.asoc.2018.02.049>
Reference: ASOC 4741

To appear in: *Applied Soft Computing*

Received date: 31-7-2017
Revised date: 19-1-2018
Accepted date: 24-2-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Firstly, BBO and GWO are improved respectively.

Then, improved BBO and opposition learning based GWO are hybridized by a new strategy, named single-dimensional and all-dimensional alternating strategy, to formulate HBBOG.

A large number of experiments are made on a set of various kinds of benchmark functions and CEC2014 test set. HBBOG is also applied to clustering optimization.
