Title: An efficient genetic algorithm for large-scale transmit power control of dense and robust wireless networks in harsh industrial environments

Authors: Xu Gong, David Plets, Emmeric Tanghe, Toon De Pessemier, Luc Martens, Wout Joseph

PII: S1568-4946(18)30022-X
DOI: <https://doi.org/10.1016/j.asoc.2018.01.016>
Reference: ASOC 4663

To appear in: *Applied Soft Computing*

Received date: 25-2-2017
Revised date: 31-12-2017
Accepted date: 15-1-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

An efficient genetic algorithm for large-scale transmit power control of dense and robust wireless networks in harsh industrial environments

Xu Gong*, David Plets, Emmeric Tanghe, Toon De Pessemier, Luc Martens, Wout Joseph
